Date: 10 April 2019

Dear

Please find enclosed the results of your second trimester screening test. The final calculation has put your baby at low risk of having Downs Syndrome.

This result needs to be attached to your maternity notes.

Please remember that this is a screening test and it is just for Downs Syndrome. It is a good test but unfortunately some babies have no signs of a problem and therefore low risk can never mean no risk.

Should you have any questions about your result, please do not hesitate to contact me.

Yours sincerely

Screening Specialist Midwives, Julia Langley / Jane Parker-Wisdom
