

Portsmouth Hospitals NHS Trust
Data Protection Impact Assessments (DPIA)

DPIA Reference	DPIA-UC-0917
DPIA Title	20:20 Urgent Care Improvement Program
Summary of Proposal	<p>The Trust senior management team are currently stretched operationally and do not have the capacity to deliver the required improvements at pace. They need support from a team with a proven track record of delivering improvements to patient flow through reductions in length of stay, discharge and bed modelling using improvement methodology. They need to be able to effectively transfer knowledge, so that all Trust staff put into practice new ways of working that are sustained. They will need to quickly identify the areas impacting on flow and performance and measure key metrics to assess the impact of any changes to ensure that these are established prior to winter.</p> <p>2020 Delivery have been brought in as the team to support the Trusts in this way.</p>
Date of Approval	September 2017
