

A stethoscope with a grey tube and silver chest piece is resting on a white lab coat. The background is a soft, out-of-focus image of the lab coat and the stethoscope's tubing.

# **ALERT**

®

ACUTE LIFE-THREATENING EVENTS RECOGNITION AND TREATMENT

**A multi-professional course created to teach clinical staff a structured and prioritised approach to the assessment and management of the acutely ill patient.**

# Welcome to ALERT®

**A one-day course applicable to all health care professionals which can be utilised in any setting.**

**The course is based on the following principles:**

- adult education including active involvement
- personal motivation
- experienced-centered learning relevance to practice
- clear goals
- use of reflective practice

It incorporates interactive workshops, practical demonstrations and role-play clinical scenarios during which you are encouraged to reflect on your actions and consider...

**What would you do next?**

**The one-day day ALERT® course contains the following sessions:**

<b>Introduction and case study</b>	<b>The ALERT® system of assessment</b>	<b>Airway workshop</b>
<b>Breathing Workshop</b>	<b>Circulation Workshop</b>	<b>Sepsis Workshop</b>
<b>Communication and Human Factors</b>	<b>Faculty Demo of ABCDE assessment</b>	<b>Candidates perform ABCDE assessment</b>

## **ALERT® - Acute Life-threatening Events Recognition and Treatment**

The ALERT® Course Syllabus recognises that partnership and teamwork are prerequisites of good quality care for the 'at risk' patient. The faculty for the ALERT® Course try to be multi-professional, emphasising the ethos of managing acutely ill patients using a team approach. The course has been designed to enable all healthcare professionals to work together and reinforces the need for written and spoken communication to be of a very high standard.

**Please note in order to obtain certification from the ALERT® Course you must attend all sessions and complete the whole day.**
